

**SYSTEM AND METHOD FOR SERVER DISPLAY CONFIRMATION RECORD
RESPONSE IN A CONNECTION ORIENTED CLIENT/SERVER PROTOCOL**

Abstract of the Disclosure

5 A system and method for operating a Telnet client to
establish a network connection with a Telnet server.
Environment parameters are negotiated for establishing a
connection-oriented connection of the client to the server,
the parameters optionally including a request for the server
10 to provide a custom confirmation record. Responsive to that
request, the server provides a custom confirmation record to
the client selectively including default or defined custom
information generated according to a customer provided exit
program.
